About the Author	xix
Foreword	xxi
Preface	xxiii

UNIT I

CHAPTER 1 Introduction and historical background	3
1.1 Introduction	3
1.2 Historical Background	3
1.2.1 Antiquity	3
1.2.2 Middle Ages.....	4
1.2.3 Age of Enlightenment.....	5
1.3 Modern Toxicology.....	6
1.3.1 After World War II.....	6
CHAPTER 2 Definitions and scope of toxicology.....	9
2.1 Definitions	9
2.2 Sub-disciplines of Toxicology	10
2.3 Toxicant and Types of Toxicants	11
2.4 Toxicity and Toxic Effects	12
2.4.1 Toxicity in Relation to Frequency and Duration of Exposure.....	12
2.4.2 Toxicity in Relation to Time of Development and Duration of Induced Effects	13
2.5 Dose and Related Terms.....	13
2.6 Other Common Terms	14
2.7 Sources of Poisoning.....	15
2.7.1 Accidental Poisoning	16
2.7.2 Malicious Poisoning	16
2.7.3 Occupational Exposure.....	16
2.8 Duration and Frequency of Exposure.....	16
CHAPTER 3 Classification of poisons/toxicants	19
3.1 Introduction	19
3.2 Classification of Poisons.....	19
3.3 Actions of Poisons	21

CHAPTER 4	Factors affecting toxicity	23
4.1	Introduction	23
4.2	Factors Affecting Toxicity	23
4.2.1	Host Factors	24
4.2.2	Factors Related to the Toxicant or Associated With Xenobiotics	26
4.2.3	Environmental Conditions	28
CHAPTER 5	Natural laws concerning toxicology.....	31
5.1	Introduction	31
5.2	Tolerance	32
5.3	Dose	32
5.4	Time Action Curves.....	35
5.5	Dose–Response Relationship.....	36
5.5.1	Graded or Gradual Dose–Response Relationship.....	36
5.5.2	Quantal or All-or-None Dose–Response Relationship	38
5.6	Statistical Concept of Toxicity	39
5.7	Variables of Dose–Response Curve	40
5.8	Frequently Used Terms for Safety Evaluation of Drugs	41
5.9	Interaction With Receptors	42
5.10	Types of Xenobiotics	42
5.11	Xenobiotic/Drug Interaction	42
5.12	Nature and Extent of Toxicity Testing.....	43
CHAPTER 6	Hazard and risk assessment	45
6.1	Introduction	45
6.2	Risk Assessment Approach.....	46
6.2.1	Preliminary Evaluation	47
6.2.2	Toxicity Assessment	47
6.2.3	Exposure Assessment	49
6.3	Conclusion.....	51
 UNIT II		
CHAPTER 7	Absorption, distribution, and excretion of toxicants	55
7.1	Introduction	55
7.2	Translocation of Xenobiotics Across Membranes	56
7.2.1	Membrane Permeability.....	56

7.2.2 Mechanism of Chemical Transfer 57

7.2.3 Processes of Transport..... 57

7.3 Absorption 60

7.3.1 Gastrointestinal Absorption 60

7.3.2 Skin Absorption 62

7.3.3 Lungs Absorption 63

7.3.4 Parenteral Administration..... 63

7.4 Distribution..... 64

7.4.1 Tissue Permeability Barriers 65

7.4.2 Transfer Across Other Membranes 66

7.4.3 Factors Affecting Distribution and Tissue Retention 66

7.4.4 Binding to Biological Macromolecules and
Toxic Effects..... 68

7.4.5 Redistribution..... 68

7.5 Excretion 68

7.5.1 Renal Excretion 69

7.5.2 Biliary Excretion..... 70

7.5.3 Gastrointestinal Tract..... 71

7.5.4 Expired Air 71

7.5.5 Sweat..... 71

7.5.6 Saliva..... 72

7.5.7 Milk..... 72

7.5.8 Vaginal Secretions 72

7.5.9 Other Routes 72

CHAPTER 8 Biotransformation..... 73

8.1 Introduction 73

8.2 Functions of Biotransformation 73

8.3 Xenobiotic Metabolizing Enzymes..... 74

8.4 Pathways of Biotransformation..... 75

8.4.1 Phase I Reactions (Nonsynthetic or
Nonconjugative Phase) 75

8.4.2 Phase II Reactions or Conjugation/Synthetic
Reactions..... 78

8.5 Complex Nature of Biotransformation 82

8.6 Induction and Inhibition of Metabolizing Enzymes..... 82

8.6.1 Induction of Enzymes 82

8.6.2 Inhibition of Enzymes 83

8.7 Bioactivation and Tissue Toxicity 83

8.7.1 Electrophiles 84

8.7.2 Free Radicals	84
8.7.3 Nucleophiles	85
8.7.4 Other Pathways	85

CHAPTER 9 Principles and basic concepts of toxicokinetics 87

9.1 Introduction	87
9.2 Essentials of Toxicokinetics/Pharmacokinetics Principles	88
9.3 Plasma Drug Concentration Versus Time	88
9.4 Orders of Rate Processes	90
9.4.1 Zero-Order Process/Zero-Order Kinetics	90
9.4.2 First-Order Process/First-Order Kinetics.....	90
9.4.3 Mixed-Order Process/Mixed-Order Kinetics	90
9.5 Toxicokinetics Models.....	91
9.5.1 Classic Toxicokinetics	91
9.5.2 Noncompartment Models/Noncompartment Analysis	103
9.5.3 Physiological-Based Toxicokinetics.....	104
9.6 Determination of Dose/Dosage Regimen	106
9.7 Conclusion.....	107

UNIT III

CHAPTER 10 Toxicological testing: genesis..... 111

10.1 Introduction	111
10.2 Laws and Regulations.....	112
10.2.1 Regulation in the United States.....	112
10.2.2 Guidelines for Drugs	113
10.2.3 Toxic Substances Control Act of the United States	115
10.2.4 REACH Regulation of European Countries	116
10.3 International Harmonization	117
10.4 Role of Animal Testing	117
10.5 Standard Information Requirements.....	118
10.6 Recent Trends	119
10.6.1 Avoid Unnecessary Testing.....	119
10.6.2 Alternate Approaches	119
10.6.3 Cheminformatics.....	120
10.6.4 Nanomaterials	120
10.7 Good Laboratory Practices	121
10.7.1 Background	122
10.7.2 Principles of Good Laboratory Practices	122

CHAPTER 11 Toxicological testing: in vitro models	123
11.1 Introduction	123
11.2 Animal Welfare Legislation	123
11.3 In Vitro Models.....	124
11.3.1 Permanent Cell Lines	124
11.3.2 Primary Cultures	125
11.3.3 Organotypic or Whole Organ Cultures	126
11.4 In Vitro Embryotoxicity Testing	126
11.4.1 Principles of In Vitro Embryotoxicity Testing	127
11.4.2 Use of In Vitro Models/Alternative Test Methods	128
11.4.3 Rat/Mice Embryos as a Model.....	128
11.4.4 Use of Cultured Embryos	129
11.4.5 Endpoint Determination for In Vitro Testing Systems	130
11.5 Conclusion.....	130
CHAPTER 12 Toxicological testing: In vivo systems	131
12.1 Introduction	132
12.2 Administration of Toxicants.....	132
12.2.1 Routes of Administration	132
12.2.2 Chemical and Physical Properties.....	133
12.2.3 Exposure and Environmental Fate	134
12.3 In Vivo Tests.....	134
12.3.1 Acute and Subchronic Toxicity Tests	134
12.3.2 Acute Oral Toxicity Testing.....	135
12.3.3 Eye Irritation.....	135
12.3.4 Dermal Irritation and Sensitization	136
12.3.5 Safety Pharmacology Studies	137
12.3.6 Subchronic Tests.....	137
12.3.7 Repeated-Dose Dermal Tests	138
12.3.8 28-Day to 90-Day Inhalation Tests	138
12.3.9 Chronic Tests	139
12.3.10 Chronic Toxicity and Carcinogenicity	139
12.4 Development and Reproductive Toxicity.....	140
12.4.1 Testing Protocols	141
12.4.2 Single- and Multiple-Generation Tests	142
12.4.3 Teratology.....	144
12.4.4 Perinatal and Postnatal Effects.....	146
12.5 Special Tests	147
12.5.1 Neurotoxicity	148

12.5.2	Potentiation and Synergism.....	149
12.5.3	Toxicokinetics and Metabolism	149
12.5.4	Covalent Binding	149
12.5.5	Immunotoxicity.....	149
12.6	In Vitro and Other Short-Term Tests	149
12.7	Ecological Effects	150
12.8	Risk Analysis	150
CHAPTER 13	Genotoxicity	151
13.1	Introduction.....	151
13.2	Historical Background	152
13.3	Germ Cell Mutation.....	152
13.4	DNA Mutations.....	154
13.5	Mutagens Are Carcinogens	155
13.6	Impact on Human Health	155
13.7	DNA Damage and Mechanism.....	156
13.8	Regulatory Requirements/Guidelines.....	157
13.9	Assays for Detection of Genetic Alterations	157
13.9.1	Prokaryote Mutagenicity	158
13.9.2	Eukaryote Mutagenicity	159
13.9.3	DNA Damage and Repair	161
13.9.4	Chromosome Aberrations.....	161
13.9.5	Mammalian Cell Transformation	163
13.10	Conclusion	164
CHAPTER 14	Preclinical toxicological investigations of pharmaceutical products.....	165
14.1	Introduction	165
14.2	Safety Evaluation of Pharmaceutical Products	166
14.2.1	Discovery Phase.....	167
14.2.2	Preclinical Toxicology Testing	169
14.2.3	Preclinical Development Phase	169
14.2.4	Studies of Environmental Safety	170
14.2.5	Postmarketing Surveillance	170
14.2.6	Estimation of the Dose	170
14.3	Conclusion.....	171
CHAPTER 15	Preclinical safety evaluation of biotechnology-derived products.....	173
15.1	Introduction	173

15.2	Background	173
15.3	Regulatory Considerations.....	174
15.4	General Principles	174
15.5	General Toxicological Profile	174
	15.5.1 Absorption, Disposition, and Clearance in Relevant Animal Models.....	175
	15.5.2 Specific Toxicity Tests.....	175
15.6	Conclusion.....	176

CHAPTER 16 Preclinical regulatory toxicology for biomaterials and medical devices 177

16.1	Introduction	177
16.2	Regulations.....	178
16.3	Objectives.....	178
16.4	Extract Preparations	178
16.5	Test Protocols.....	178
16.6	Short-Term Tests	179
	16.6.1 Acute Toxicity	179
	16.6.2 Pyrogenicity	179
	16.6.3 Hemolytic Properties	179
	16.6.4 Intracutaneous/Intradermal Reactivity Test	179
	16.6.5 Skin Irritation.....	180
16.7	Long-Term Tests.....	180
	16.7.1 Delayed Hypersensitivity/Sensitization Test.....	180
	16.7.2 Implantation	180
	16.7.3 Genotoxicity.....	181
16.8	Supplementary Tests.....	181
	16.8.1 Subchronic Toxicity.....	181
	16.8.2 Chronic Toxicity	181
	16.8.3 Carcinogenicity	181
	16.8.4 Developmental and Reproductive Toxicity	182
16.9	Conclusion.....	182

UNIT IV

CHAPTER 17 Toxic effects of pesticides (agrochemicals)..... 185

17.1	Introduction	185
17.2	Historical Background	186
17.3	Definition and Classification.....	186

17.4	Insecticides.....	187
17.4.1	OC Insecticides.....	187
17.4.2	OP and CM Compounds.....	189
17.4.3	CMs Insecticides.....	192
17.4.4	Botanical Insecticides.....	195
17.4.5	Pyrethroid Insecticides.....	196
17.4.6	New Insecticide Classes.....	196
17.5	Herbicides.....	198
17.6	Fungicides.....	199
17.7	Rodenticides.....	200
17.8	Fumigants.....	201
17.8.1	Aluminum Phosphide.....	202
17.8.2	Naphthalene (Mothballs).....	202

CHAPTER 18 Toxic effects of metals 203

18.1	Introduction.....	203
18.2	Arsenic (Sankhyal, Somalkar).....	203
18.3	Mercury (Quick Silver, Liquid Metal, Para, Padarasa).....	205
18.4	Lead (Shisha).....	208
18.5	Copper (Thambe, Blue Vitriol).....	211
18.6	Iron.....	212

CHAPTER 19 Toxic effects of nonmetallics 215

19.1	Introduction.....	215
19.2	Toxicity of Nonmetallics.....	215
19.3	Phosphorus.....	216
19.4	Chlorine.....	218
19.5	Bromine.....	218
19.6	Iodine.....	219
19.7	Formaldehyde (Formalin, Methyl Aldehyde, Methylene Oxide).....	220

CHAPTER 20 Neurotoxic agents 221

20.1	Introduction.....	221
20.2	Opium (Afim) Derivatives.....	222
20.2.1	Opioid Poisoning.....	224
20.3	Pethidine (Meperidine).....	225
20.3.1	Pethidine Addiction.....	225
20.4	Alcohol.....	226
20.5	Ethylene Glycol.....	229

20.6	Chloroform.....	230
20.7	Ether	230
20.8	Chloral Hydrate (Trichloroacetaldehyde)	231
20.9	Barbiturates	231
	20.9.1 Classification	232
20.10	Benzodiazepines	234
20.11	Hydrocarbons	235
20.12	Insecticides.....	236
20.13	Datura.....	236
20.14	Cannabis.....	237
	20.14.1 Cannabis Addiction	239
20.15	Cocaine	240
	20.15.1 Cocainism	242
20.16	Strychnine	243
 CHAPTER 21 Toxic effects of cardiac poisons.....		245
21.1	Introduction	245
21.2	Oleanders.....	245
21.3	Aconite	247
21.4	Nicotine (Tobacco)	249
 CHAPTER 22 Toxic effects of asphyxiants		253
22.1	Definition	253
22.2	Classification.....	253
	22.2.1 Chemical Asphyxiants	254
	22.2.2 Simple Asphyxiants	254
	22.2.3 Respiratory/Pulmonary Irritant Asphyxiants.....	254
	22.2.4 Systemic Asphyxiants.....	254
22.3	Carbon Monoxide	254
22.4	Carbon Dioxide	256
22.5	Cyanide (Prussic Acid, Cyanogen).....	257
22.6	Ammonia (NH ₃).....	260
22.7	War Gases	262
	22.7.1 Lachrymators (Tear Gases)	262
	22.7.2 Lung Irritants (Asphyxiants, Choking Gases).....	262
	22.7.3 Nasal Irritants and Vomiting Gases (Sternutators).....	263
	22.7.4 Nerve Gases	263
	22.7.5 Vesicants (Blister Gases).....	263
	22.7.6 Paralysants (Nerve and Blood Poisons).....	264
	22.7.7 Miscellaneous War Gases.....	264

CHAPTER 23	Toxic effects of caustics (corrosives)	267
23.1	Introduction	267
23.2	Classification	267
23.3	Acids	268
23.3.1	Inorganic Acids/Mineral Acids	268
23.3.2	Organic Acids	271
23.4	Alkalis	275
CHAPTER 24	Drug toxicity, dependence, and abuse	277
24.1	Introduction	277
24.2	Aspirin and Other Salicylates	278
24.3	Paracetamol	278
24.4	Drug Dependence and Abuse	279
24.4.1	Definitions and Terminology	279
24.4.2	Hallucinogens (Psychedelics)	282
24.4.3	Lysergic Acid Diethylamide	282
24.4.4	Peyote	284
24.4.5	Amphetamines (Central Nervous System Stimulant, Hallucinogen)	284
24.4.6	Carbon Tetrachloride	285
24.5	Withdrawal Symptoms (Abstinence Syndrome)	285
CHAPTER 25	Toxic effects of domestic chemicals	287
25.1	Domestic/Household Poisons Classification	287
25.2	Hydrocarbons	287
25.2.1	Aliphatic Hydrocarbons	287
25.2.2	Aromatic Hydrocarbons	290
25.2.3	Halogenated Hydrocarbons	290
25.3	Other Than Hydrocarbons	290
CHAPTER 26	Toxic effects of poisonous plants	293
26.1	Introduction	293
26.2	<i>Abrus precatorius</i>	293
26.3	<i>Ricinus communis</i> (Castor Oil Plant)	295
26.4	Croton	296
26.5	Calotropis	297
26.6	<i>Semecarpus anacardium</i>	298
26.7	<i>Capsicum annuum</i>	299
26.8	<i>Eucalyptus Globulus</i>	300
26.9	<i>Colchicum (Colchicum autumnale)</i>	301
26.10	Ergot	302

CHAPTER 27	Poisonous foods and food poisoning.....	305
27.1	Introduction	305
27.2	Microbial Toxins.....	305
27.3	Food Poisoning	306
27.4	Mycotoxins.....	307
27.5	Algal Toxins.....	308
CHAPTER 28	Poisons of animal origin	311
28.1	Introduction	311
28.2	Animal Poisons	312
28.3	Arthropods.....	312
28.3.1	Arachnids	313
28.3.2	Myriapods (Centipedes, Chilopoda).....	315
28.3.3	Insects	316
28.3.4	Cantharides (Spanish Fly Blister Beetle, Lytta)	317
28.4	Mollusks	317
28.4.1	Cone Snails	317
28.5	Reptiles.....	318
28.5.1	Lizards.....	318
28.5.2	Venomous Snakes.....	319
28.5.3	Nonvenomous Snakes.....	324
28.5.4	Other Reptile Bites	325
28.5.5	Alligators and Crocodile.....	325
28.5.6	Iguana.....	325
CHAPTER 29	Chemical food poisoning.....	327
29.1	Introduction	327
29.2	Mushrooms.....	327
29.3	Poisonous Plant Toxins.....	328
29.4	Poisonous Marine Bites and Stings	329
29.4.1	Poisonous Fishes.....	329
29.4.2	Shellfish	330
CHAPTER 30	Health effects of radioactive materials	333
30.1	Introduction	333
30.1.1	Historical Background	333
30.1.2	Regulatory Aspects of Radiation.....	334
30.1.3	Standards for Radiation Exposure.....	334
30.1.4	Units of Radiation.....	335

30.2 Types of Radiation..... 335
30.2.1 Nonionizing Radiation..... 336
30.2.2 Ionizing Radiation 337

UNIT V

CHAPTER 31 Basic concepts of forensic toxicology..... 343

31.1 Introduction 343
31.2 History and Background 343
31.3 Courtroom Testimony..... 344
31.4 Investigation 344
31.4.1 Collection of Information 344
31.4.2 Collection of Specimens..... 345
31.4.3 Toxicological Analysis 345
31.4.4 Documentation and Data Interpretation 345

CHAPTER 32 Applications in toxicology..... 347

32.1 Introduction 347
32.2 Objectives of Analytical Toxicology 347
32.3 Analytical Schemes for Toxicant Detection 348
32.4 Laboratory Analyses 348
32.4.1 General Precautions 350
32.5 Wet Chemistry 350
32.5.1 Qualitative Analytical Tests 350
32.5.2 Quantitative Analytical Methods..... 353

CHAPTER 33 Clinical toxicology 355

33.1 Introduction 355
33.2 Historical Background 355
33.3 Introduction of the Poison Control Center 356
33.4 Acute Poisoning Deaths..... 357
33.5 Causes of Poisoning..... 357
33.6 Principles of Diagnosis 358
33.6.1 Clinical History..... 358
33.6.2 Physical Examination 358
33.6.3 Analytical Evidence..... 360
33.7 General Management of Poisoning 361
33.7.1 Initial Stabilization 361
33.7.2 Specific Measures 361
33.7.3 Decontamination 362

33.8	Dialysis.....	364
33.9	Nursing and Psychiatric Care	364
CHAPTER 34	Treatment of poisoning	365
34.1	Introduction	365
34.2	Specific Treatment (Administration of Antidotes)	365
	Further Reading	369
	Index	381
