<i>Preface</i>	(v)
<i>Acknowledgement</i>	(vii)

Unit – I

History of Computers in Pharmaceutical Research

Statistical Modelling in Pharmaceutical Research and Development ..	4
Statistical Modelling	5
Types	5
Statistical Parameters, Estimation	6
Confidence Regions	8
Nonlinearity at the Optimum.....	8
Sensitivity Analysis.....	8
Optimal Design	10
Population Modeling	13
Quality by Design in Pharmaceutical Development	15
Tools Applied in QBD Approach.....	16
Applications of Quality-By-Design.....	16
ICH Q8 Guideline	19
Drug Substances	20
Excipients	20
Formulation Development.....	20
Container and Closure System	20
Microbiological Attributes	20
Compatibility.....	21
Regulatory and Industry Views on QBD	21
Regulatory Challenges and Inspection	22
Bibliography.....	24

Unit – II

Computational Modelling of Drug Disposition Simulation Modelling

Importance of Simulation Modeling	26
Empirical Classical Compartmental Model	27
Types of Computational Modeling	28
Modeling Techniques Pharmaceutical Parameter Consider in Drug Absorption	29
In Drug Distribution	31
In Drug Metabolism	33
Membrane Transporter	33
Active Transporter	34
Bibliography	37

Unit – III

Concept of Optimization, Optimization Parameters

Factorial Design	39
Screening Design	41
Box-Behnken Experimental Design	41
Computers in Pharmaceutical Formulation	42
Development of Pharmaceutical Emulsions, Microemulsion Drug Carriers	43
Legal Protection of Innovative uses of Computers in R&D	43
The Ethics of Computing in Pharmaceutical Research	48
Ethical Issues: Privacy, Liability, Ownership, And Power	48
Privacy	49
Ownership	50
Power	51
Bibliography	55

Unit – IV

Computer Aided Biopharmaceutical Characterization

Gastrointestinal Simulation	58
Types of Models	58

Model Construction.....	59
Parameter Sensitivity Analysis	60
<i>In Vitro</i> Dissolution and <i>In Vitro–In Vivo</i> Correlation.....	62
Evaluation of Predictability.....	66
Biowaiver Considerations	66
Computer Simulation in Pharmacokinetics and Pharmacodynamics.....	67
Computers in Clinical Development.....	69
Clinical Data Collection and Management	69
Bibliography.....	72

Unit –V

Artificial Intelligence

Importance of AI in Pharmacy	78
Pharmaceutical Companies using AI	81
Robotics.....	82
Use of Robots in the Pharmaceutical Industry	83
Computational Fluid Dynamics	85
Pharmaceutical Applications.....	90
Current Challenges and Future Directions	93
Bibliography.....	95
